

Datto Cloud Continuity for PCs

Eliminate data loss and help get your employees back up and running quickly with Datto Cloud Continuity for PCs. This reliable, image-based, all-in-one backup and recovery solution provides backup direct to the Datto Cloud, screenshot verification, and multiple layers of recovery capabilities, including Bare Metal Restore and File/Folder Recovery. In the event of a lost or stolen PC, accidental deletion, ransomware attack, or other disaster, we can quickly and easily get your employees back up and running exactly as they had been before.

All-in-One Backup and Recovery for PCs

Whether it's because of a ransomware attack, lost or stolen device, or accidental deletion of a file, Cloud Continuity offers a solution not only for the protection of endpoint business data on Windows-based devices, but also for streamlined recovery of the entire device configuration, setup and applications.

- Easily restore individual files and folders
- Reliably recover from ransomware attacks
- Rapidly restore lost or stolen PCs
- Simple admin self-service file/folder recovery for clients

Reliable PC Backups

PCs move between networks or get powered off, making it difficult to get reliable backups. Datto Cloud Continuity for PCs backup automatically pauses when the device has its connection interrupted, and then automatically resumes once the connection is restored. Integrity checks, like Screenshot Verification, validate every backup and provide an alert if there are any issues. This takes the guesswork out and ensures backups are good for reliable recovery.

Predictable Billing

Cloud Continuity for PCs employs a simple price model so there will never be any billing surprises. There are no additional recovery charges and backups are available with one-year, time-based retention (TBR) in the Datto Cloud.

Protect Business Data No Matter Where It Lives

Datto Cloud Continuity for PCs is part of Datto's entire Unified Continuity product line, which includes complete protection for servers, private or public cloud and SaaS data. Datto Cloud Continuity offers a powerful way to protect a broad range of PCs no matter where they operate from, delivering the highest levels of business uptime.

Datto Cloud Continuity for PCs

Key Features

- Image-based cloud backup and recovery
