NETWORK SECURITY

STORMSHIELD
**NETWORK
SECURITY**

Unified Threat Management Solutions and Next-
Generation Firewalls

Our Mission

Make the digital world a sustainable and trustworthy environment while ensuring business continuity and data protection for organizations, their employees, and their customers.

smile

YOU'RE PROTECTED

SECURITY THAT'S TRANSPARENT

In a *Bring-Your-Own-Everything* world, it is becoming increasingly difficult to control users when we want **to develop an agile company that moves with the times**. For security to be effective, it needs to be seamless for both users and administrators.

SECURITY THAT'S COLLABORATIVE

A new approach to security is needed. It's this need that drove Stormshield to develop Multi-Layer Collaborative Security as a response. This holistic model, based on **active collaboration between the security engines of our different solutions**, is the future of in-depth, information system defense.

SECURITY THAT SCALES

Because security solutions require several years of investment, Stormshield Network Security products provide the modularity and features you need to **keep abreast of future changes** to the information system.

Take advantage of the best security

Unrivaled performance at an unbeatable price

No reduction in performance when maximum security measures (IPS) are activated. The gigabit per second price of Stormshield's protection can't be beat.

Ensure that your activity will continue uninterrupted

Our solutions include all of the protection technology needed to hold out against even the most sophisticated attacks.

Protect your internet use

Monitor internet use and control the impact on your business applications.

Connect your employees

Your employees will have secure access to your company's resources, no matter where they are and what device they're using.

Save time

Our solutions are designed to be intuitive and easy to use, so you can protect your company quickly and without fail.

Manage vulnerabilities

Identify obsolete or vulnerable applications on workstations and servers in real time, and apply custom protections with one click.

Meet your compliance commitments

Ensure your compliance with access control standards, regulations, and norms (PCI-DSS, ISO 27001, Data Protection Act, etc.).

Protection is Simple and Easy

Stormshield delivers many different features.

User-Friendly Interface

Security has never been so easy. For example, managing your filtering policy is simple with our rule compliance verification tool. No longer will rules slip past you.

Easy Setup

With our installation assistants, you can put protections in place for your company with just a few clicks.

Wide Range of Features

Besides the many features included with the solution, you will have access to a complete array of administrative tools.

Cloud-Based Sandboxing

You no longer need to live in fear of unknown or sophisticated attacks. With Breach Fighter, you are shielded by real-time protections.

Real-Time Protection

Intrusion detection and prevention
Application control
Antivirus

Monitoring & Supervision

URL filtering
IP Geolocalization
Vulnerability detection
Extended Web Control

Content Filtering

Custom Solutions

Products adapted to your industry

Defense and Military Organizations

- Choose trusted products
- Highest-level protection
- Manage the way your communications are protected
- Centralized for easier management
- Easily integrates with your existing structure

Health and Healthcare Facilities

- Guarantee the availability of your services
- Protect medical records
- Combine mobility and security
- Make patient data management easier

Public Administrations

- Vulnerability management
- Fast return on investment
- Choose trusted solutions

Retail and E-Commerce

- Grow your business in complete security
- Guarantee transactions, even when there's an outage
- Secure your servers and web applications
- Manage customer data

Industry

- Protect your industrial chain from beginning to end
- Secure access and remote workstations
- Ensure network availability
- Taking inventory of industrial equipment

Education and Academia

- Performance
- Secure your communications
- Centralize your security management
- Traceability

MSSPs and Other Service Providers

- Reduce your operating costs
- Simplify network administration
- All-in-one functional coverage
- Offer on-demand services to your customers
- Support your sales force

Banking and Finance

- A reliable product
- Fully supported compliance
- Reduce your costs and risk levels
- Optimized real-time risk management
- Make customer data management easier

Datacenters

- Combine security, reliability & flexibility
- End-to-end risk management
- Reduce operating costs

Virtual Security

means real-world protection

Virtual Appliances

Better security for virtual environments

Many organizations are shifting to the Cloud to streamline their IT infrastructure, to take advantage of technologies that significantly reduce total cost of ownership (TCO), to simplify use, and to make upgrading and rapid restoration after an incident easier.

Stormshield Network Security's virtual appliances support this shift by providing the same level of protection and the same broad array of capabilities as its physical products.

Cloud UTM

Cloud-based solutions

Companies need to deploy a virtual, cloud-based infrastructure in a secure and controlled manner. That is why all of the Stormshield Network Security solutions' capabilities are included in the Stormshield Network Cloud UTM application, made for Cloud environments.

Effective protection of servers, web services, and virtual applications on an Amazon Web Services or Microsoft Azure Cloud

Simplified implementation via the Amazon Web Services Marketplace or Microsoft Azure

Complete Security Without Compromise

All security features are available, to provide optimal protection.

Budget Control

With no initial cost, the Cloud provides on-demand security and reduces maintenance costs.

Scalable & Portable

What if your needs change over time? It's no problem, your security will change along with them.

Automatic Updates

There's no need for tedious maintenance. Your teams will be able to focus on their jobs.

Managed security is effective security

Manage and Analyze

Web Interface

This simple and easy-to-use interface is provided with our security solutions, allowing you to manage the security policy for your infrastructure. It also shows you all of your network and activity data at a glance.

Supervise

Visibility Center

Stormshield Visibility Center is a turnkey solution that provides you with unified reports on security events affecting all of your product lines. This provides you with an overall understanding of your infrastructure and data security.

Optimize

Management Center

Stormshield Management Center optimizes your administrative tasks, giving you the time to work on what's really important and ensuring that your network functions properly and remains secure.

Physical Solutions

* Performance is measured in a laboratory under ideal conditions for version 3.x. Results may vary based on testing conditions and the version of the software.

Stormshield Network Security in a few key points

SOVEREIGN SOLUTION

As a French cybersecurity provider, we have been providing solutions that meet European legal requirements for the last 15 years.

CERTIFICATIONS

Our technologies have the highest level European certifications, guaranteeing customized protection for your organizations' most sensitive and strategic information.

ECOSYSTEM

We work with other security providers to develop joint solutions, share information about threats, and collaborate to improve our customers' defenses.

ALL-IN-ONE SECURITY

You will have access to all integrated security features for either traditional or Cloud infrastructure.
At no extra cost.

PERFORMANCE

Our solutions have the best cost per Gigabit/s, and provide unrivaled performance with the Intrusion Prevention System (IPS) activated for optimal security.

DYNAMIC COLLABORATION

Our firmware has an algorithm that dynamically adjusts your security policy (Host reputation). The greater the threat, the higher the level of protection.

UNIQUE FIRMWARE

Stormshield makes security easy with its single interface.

SERVICE PACKS

Choose from among four simple and clear security service packages that include hardware maintenance for your product.

TECHNICAL SUPPORT

Our technical support is available 24/7, working closely with our R&D teams to provide you with our developers' expertise.

STORMSHIELD

Stormshield is a wholly-owned subsidiary of Airbus CyberSecurity that provides innovative end-to-end security solutions for protecting networks (Stormshield Network Security), workstations (Stormshield Endpoint Security) and data (Stormshield Data Security).
